A. Keith McDonald, Mayor

FOR IMMEDIATE RELEASE: April 25, 2022

Bartlett Citywide Streetlight Audit

Bartlett, TN— The City of Bartlett initiated a citywide streetlight audit in preparation for a systemwide conversion to new energy-efficient LED streetlights. LED streetlights will reduce energy and maintenance costs while providing better lighting for the community.

“The City of Bartlett is partnering with PATH Company to explore the possibility of a city-wide streetlight conversion project resulting in the utilization of new, more efficient LED technology. This conversion will save money on the annual cost of street lights and be more efficient with better lighting and service for our community.” Mayor A. Keith McDonald.

Evri GIS Consulting will be recording field data of every streetlight in the city working Monday through Friday between April 28th through the middle of June between the hours of 7 a.m. and 5 p.m. Evri’s auditors will be wearing safety vests during field data collection and their vehicles will be clearly marked. As with all utility workers in Bartlett, drivers are advised to please maintain a safe distance from pedestrians and parked vehicles while driving.
